

Dear Muftisaab,

I have decided to write a letter to you to make this school more environmentally friendly. I am concerned about the state of the planet and how we humans are slowly destroying our home. As humans we make mistakes in life, we are not realising that we are making mistakes, and so I am trying to get others to help me recycle and to be eco-friendly. I want to get our school in action.

I'm worried that the school uses disposable plastic cups, plastic bottles, plastic cartons, plastic rulers, and other plastic materials. I witness students dropping plastic wrappers, bottles, and containers either outside or on the chairs forgetting to take it home on a daily basis, either accidentally or on purpose. I want to make our school more eco friendly

The reason why plastic is not environmentally friendly is because plastic, and especially single-use plastic, damages the ecosystem, kills marine life, overflows our landfills. Lakes and rivers have been polluted and toxic substances escape into the air, water and lands.

Would you take into account the following list of eco-friendly suggestions for Al Ashraf secondary school?

Stop selling plastic cups and other things made of plastic.

Each student should get silicone cups to reuse (10p) each instead of plastic cups.

More water fountains to drink from in and around classrooms and public spaces would help reduce the usage of plastic.

More reuse and wood equipment are needed.

We should start planting a tree.

Please take into account my plea and help the school in going green.

Yours sincerely, Asima Uddin.
