

Al-Ashraf Secondary  
School For Girls  
19th May 2023

Dear, Mufti Saab,

I am writing to you to express my suggestions and thoughts on how we can make our school more environmentally friendly. Our environment has come under serious threat. This threat is almost entirely due to human activities. 31% of the earth's land surface is covered by forests. More than 75 percent of all land-based life inhabits forests. The world is trying to tell us and give us signs, why do you think that the natural disasters are so common nowadays?

An example of a threat that our environment is facing is global warming. And deforestation (cutting down and destroying trees) contributes to global warming by 10%. It may seem like a small percentage, but the impact is colossal.

By absorbing carbon dioxide from the atmosphere, plants help to combat climate change. Being among greenery enhances our mood, reduces stress and improves our mental wellbeing. Green spaces encourage more social interaction and a stronger sense of community. Therefore, helping us in class, giving us motivation.

I hope you take into account these factors and allow us to plant a sunflower for each classroom,, To bring motivation in each classes the biggest sunflower can earn a price at the end. Sunflowers are not only a beautiful sight but also good for the environment. Thank you for reading have a nice day.

By Kashma, Saima and Umaiza
