

Dear Mufti sab,

Aww, I have been assigned to write a letter to you on how we can become more eco friendly in our school, I have a few suggestions. First of we could sell more healthy alternatives in school as most of the item's sold in tuk shop are very unhealthy (it also costs a lot) and the packaging is made from mostly plastic and plastic pollution changes habitats and natural processes, reducing ecosystems ability to adapt to climate change, directly affecting millions of people's lives Instead of selling those items maybe sell alternatives like fruit and selling squash.

We could also implement more plant life into our classrooms as this would not only help the Earth, but also the student as they can have something to brighten up their mood, making them more eager to learn. A example is a class tree that once grown enough can be donated to Gloucester park.
